

General	1) The website should enable Admin to add blogs and images.		
	2) The website should be SEO friendly. Care should be taken to ensure all elements are installed to ensure this	Ref (new Functionality APP and Website)	1
Implement Calendly	Calendly login - karel@ew.energy		
Pages	Very Important - Mention must be made that all documents comply to SANS 10142-1 Official documents as stipulated by SANS, we conform to all the regulations in our templates to ensure your electrical documentation complies with the latest standards.		
Home Page or other			
Value proposition (Value add functionality)			
Save 60% on time	Completing Certificates of Compliance (CoCs) digitally on the EW Platform can save you up to 60% of the time required to complete them manually, improving efficiency and reducing administrative workload.	These are value add functions. Make mention in the website of the functionality	
Team Members	Add team members to collaborate on a job and assign specific roles and responsibilities to ensure efficient task management and accountability.	These are value add functions. Make mention in the website of the functionality	
Complete the COC on site	Complete the CoC immediately on-site. If preferred, use the Notes section to record test readings and observations, allowing you to finalise the Certificate of Compliance conveniently from your office later.	These are value add functions. Make mention in the website of the functionality	
Images and Videos	Capture photos and videos directly on-site. All media is automatically stored securely in the cloud, providing a permanent record that can be accessed anytime, from anywhere.	These are value add functions. Make mention in the website of the functionality	
Checks and Balances	The built-in checks and balances help minimise user mistakes. The built-in test parameters guide the user through each test, reminding the electrician of the relevant regulations.	These are value add functions. Make mention in the website of the functionality	
Less Paperwork	All work is securely saved in the cloud	These are value add functions. Make mention in the website of the functionality	
Voice to text	Use the powerful voice-to-text functionality to quickly capture notes and complete CoC fields hands-free, saving time and reducing manual data entry while on-site.	These are value add functions. Make mention in the website of the functionality	
Job Labels	Assign custom labels to organise and distinguish between different job types, such as Maintenance, Inspections, Quotes, and Invoices, making it easier to manage, filter, and track work activities.	These are value add functions. Make mention in the website of the functionality	
Archive	Archive completed jobs digitally and keep all records securely stored in one place. No more stacks of paperwork, misplaced files, or time wasted searching for historical job information.	These are value add functions. Make mention in the website of the functionality	
Document sharing	Add supporting documents and annexures to your job record. Arrange the documents in your preferred order, and the system will automatically merge them into a single PDF, ready to share with clients, inspectors, or stakeholders.	These are value add functions. Make mention in the website of the functionality	
Latest technology	Take advantage of the latest app and web technologies to streamline your workflow and enhance your overall experience. Spend less time on administration and more time focusing on the work that matters.	These are value add functions. Make mention in the website of the functionality	
Pay as you go	Purchase tokens quickly and conveniently through the website or mobile app whenever you need them. No waiting, no paperwork—simply top up your account and continue working without interruption.	These are value add functions. Make mention in the website of the functionality	
Work offline	No network signal? No problem. The built-in offline mode allows you to complete your job without an internet connection. Once connectivity is restored, your data will automatically sync to the cloud.	These are value add functions. Make mention in the website of the functionality	
Templates	Mark frequently used documents as templates to save even more time. Repetitive fields can be pre-populated, eliminating the need to enter the same information repeatedly and helping you complete jobs faster and more consistently.	These are value add functions. Make mention in the website of the functionality	
Sign-off	Send a secure link to your client to sign documents digitally. Once the client signs, the system automatically imports the signature into the correct field, completing the document instantly. This saves valuable time and eliminates the need to deliver documents in person for signatures.	These are value add functions. Make mention in the website of the functionality	
Annexure pages	Save even more time with pre-designed annexure pages. Information such as other circuits can be automatically transferred to the relevant annexure pages, reducing repetitive data entry and streamlining document completion. This means less administration and more time focused on your work.	These are value add functions. Make mention in the website of the functionality	

Support	With Energy Warehouse's dedicated support team, you can have complete peace of mind knowing that your queries will be resolved in a timely and professional manner.		
Add contacts page	Potential users must be able to ask a question or do a query		
Primary call-to-action (Book for a demo) How do i get started?	Getting Started: Create Your First COC

FAQs			
	Q Are the COCs generated compliant with the latest regulations?		
	A Yes, the COC's are compliant with the latest regulations. we are constantly updating the app/website and working closely with advisors and accreditation bodies to ensure that our COC's are compliant with the latest regulations		
	Q Are the EW documents proprietary designs, or are they based on Department of Labour documentation?		
	A EW documents are not arbitrary in-house designs. They are digital versions developed in accordance with Department of Labour requirements and relevant industry regulations, ensuring compliance while providing a more efficient and user-friendly experience.		
	Q Do my clients need the app?		
	A No, your clients do not need the app. After generating the final COC, you will receive a PDF which you can send them via email or WhatsApp		
	Q Are documents stored forever?		

	Yes, all documents that have been created is save securely on the cloud. You can retrieve them anytime and anywhere		
	Q Can more than one person work an a job?		
	Yes. You can invite team members to join your company account and collaborate on jobs and documents. The platform allows you to assign specific roles and permissions to each team member, ensuring they have access only to the features and information required for their responsibilities. Please note that the team collaboration feature is available exclusively on the Solo and Team subscription plans. A The token plan caters for 1 team member only.		
	Q How does billing work?		
	You can choose between a monthly subscription or a Pay-As-You-Go Token option, depending on your business needs. With the Token plan, 1 token provides: 1 × SANS-compliant document 1 × Photo Report Tokens can be purchased at any time, giving you the flexibility to buy only what you need, when you need it. For your convenience, all invoices and billing history are securely stored and remain accessible within the app at any time. A		
	Q Do tokens expire?		
	No. Tokens do not expire, so you can use them whenever you need them. Please note that tokens are non-refundable, cannot be redeemed for cash, and cannot be transferred to another user account. A
